The application has been amended as follows:

- Replace the title with the following: "DIGITAL SIGNAL PROCESSING ARCHITECTURE WITH A WIDE MEMORY BANDWIDTH AND A MEMORY MAPPING METHOD THEREOF"
- Cancel claims 7-10 and 19-33.

### **EXAMINER'S COMMENT**

#### ***Drawings***

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. The objection to the drawings will not be held in abeyance.

***Election/Restrictions***

3. The previous restriction requirement is hereby *withdrawn*. The present examiner has determined that there would be no undue burden on the examiner to examine claims 1-6 and 11-18 together. Applicant's remarks filed with the response of December 27, 2007 are therefore moot.
4. This application is in condition for allowance except for the presence of claims 7-10, non-elected without traverse on April 26, 2006. Accordingly, these claims have been cancelled above.
5. This application is in condition for allowance except for the presence of claims 19-27, non-elected without traverse on December 27, 2006. Accordingly, these claims have been cancelled above.
6. Newly submitted claims 28-33 directed to an invention that is independent or distinct from the invention originally claimed for at least the following reasons: (1) most significantly, the calculation element independently accesses the memory units, which is not required of claims 1-6 and 11-18; also note that (2) the digital processor of claims 28-33 may be a processor other than a digital signal processor (DSP) and (3) there is no requirement for a particular structure describing the connection of eight memory units in claims 28-33.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 28-33 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claims withdrawn by original presentation are considered non-elected without traverse. Since the application is in condition for allowance, these claims have been cancelled above.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Peikari whose telephone number is (571) 272-4185. The examiner is generally available between 7:00 am and 7:30 pm, EST, Monday through Wednesday, and between 5:30 am and 4:00 pm on Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Reginald Bragdon, can be reached at (571) 272-4204. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
